Generally Aggravated by Exposure NONE

Emergency and First Aid Procedures

**Section VII — Precautions for Safe Handling and Use**

Steps to Be Taken in Case Material is Released or Spilled

This product is based upon calcium sulfate; commonly called Plaster of Paris. Thus it will harden after exposure to moisture to activate it. It is a generally insoluble, inert material. Plaster of Paris finds medical use in casts to immobilize to allow breaks to set.

Work Control Method  
Sweep up and dispose of with nonhazardous solid waste in accordance with State and Federal Regulations which you should familiarize yourself with.

Precautions to Be Taken in Handling and Storage

Store in a dry location. Since product sets with moisture, avoid spills that can contact. It is not dangerous to handle per this MSDS.

Other Precautions

NOTE: AVOID STRONGLY ALKALINE SOAPS FOR PERSONAL CLEANUP, PARTICULARLY SOAPS BASED UPON BORAX. THE USE OF NORMAL SYNTHETIC DETERGENT HANDCLEANERS IS OK.

**Section VIII — Control Measures**

Respiratory Protection (Specify Type)

IF dust is created, use a dust mask.

Ventilation	Local Exhaust For dust, should it be created.	Special
	Mechanical (General)	Other

Protective Gloves

Not necessary, but always a good precaution.

Eye Protection

Wear eye goggles, if dusty (usually not).

Other Protective Clothing or Equipment

Work Hygiene Practices

Material dries to hard, crusty solid. Wash from hands and clothing while still damp or wet. Use normal synthetic detergents to clean yourself. Avoid highly alkaline soaps. Avoid the use of soaps based upon borax which may cause itching and irritat
