#### Section III — Physical Data

Evaporation rate: Slower than ether

Solubility in water: Miscible Vapor density: Heavier than air Boiling range: 78°F-218°F

Gal. Wt. (#/gal.): 7.94-9.63 Volume % volatile: 62.4-69.2 Weight % volatile: 46.7-60.29 • v.o.c. (#/gal): 4.0-6.0

## Section IV: Fire & Explosion Data

Flash point (Closed cup): 73-100°F Approx. flammable limits: 0.7-13.1%.

Extinguishing media: Water spray, foam, carbon dioxide, dry

chemical

Special fire fighting procedures: Full protective equipment, including self-contained breathing apparatus, is recommended. Water from fog nozzles may be used to cool closed containers to prevent pressure build up.

Unusual fire & explosion hazards: When heated above the flash point, emits flammable vapors which, when mixed with air, can burn or be explosive. Fine mists or sprays may be flammable at temperatures below the flash point.

## Section V — Health Hazard Data

#### General effects

Ingestion: Gastro-intestinal distress.

In the unlikely event of ingestion, call a physician immediately and have names of ingredients available.

Inhalation: May cause nose and throat irritation. Repeated and prolonged overexposure to solvents may lead to permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are signs that solvent levels are too high. If affected by inhalation of vapor or spray mist, remove to fresh air. If breathing difficulty persists, or occurs later, consult a physician. These products may be used in combination with a hardener which contains an isocyanate. Exposure to isocyanates may cause asthma-like reactions with shortness of breath, wheezing, cough or lung sensitization. This effect may be delayed for several hours after exposure. Individuals with tung or breathing problems or prior reaction to isocyanates must not be exposed to vapors or spray mist of this product.

Skin or eye contact: May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis. In case of eye contact, immediately flush with plenty of water for at least 15 minutes; call a physician. In case of skin contact, wash with soap and water. If irritation occurs, contact a physician.

Specific effects

Butyl Acetate: Extremely high concentrations have caused blood changes and weakness in laboratory animals. Methyl Ethyl Ketone: High concentrations have caused embryotoxic effects in laboratory animals. Methyl Ethyl Ketone (MEK) has been demonstrated to potentiate (i.e., shorten the time of onset) the peripheral neuropathy caused by either N-Hexane or Methyl N-Butyl Ketone. MEK by itself has not been demonstrated to cause peripheral neuropathy. Liquid splashes in the eye may result in chemical burns. Toluene: Recurrent overexposure may result in liver and kidney injury. High airborne levels have produced irregular heart beats in animals and occasional palpitations in humans. Rats exposed to very high airborne levels have exhibited high frequency hearing deficits. The significance of this to man is unknown. Propylene Glycol Monomethyl Ether Acetate: May cause moderate eye burning. Recurrent overexposure may result in liver and kidney injury. Xylene: high concentrations have caused embryotoxic effects in laboratory animals. Recurrent overexposure may result in liver and kidney injury. Can be absorbed through the skin in harmful

amounts. VM&P Naphtha and Medium Mineral Spirits: Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown significant increases of kidney damage nor kidney or liver tumors. Lead Chromate Molybdate and Lead Chromate: Overexposure to lead may cause adverse effects to the blood forming, nervous, usnary, reproductive systems including embryotoxic effects. Symptoms may include loss of appetite, anemia, disturbance of sleep and fatigue. See OSHA Lead Standard 29CRF1910.1025 for exposures longer than 8 hours. The OSHA exposure limit is reduced by this formula: Limit (in  $\mu g/m^3$ ) = 400/hours worked in the day. These pigments are NTP carcinogens. Titanium Dioxide: In a lifetime inhalation test, lung cancers were found in some rats exposed to 250 mg/m³ respirable titanium dust. Analysis of the titanium dioxide concentrations in the rat's lungs showed that the lung clearance mechanism was overwhelmed and that the results at the massive 250 mg/m3 level are not relevant to the workplace. Acrylic polymer: Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis. Chromeantimony titanate: Repeated and prolonged overexposure may lead to chronic lung disease. Antimony and chromium are incorporated into the crystal structure of titanium dioxide. As such, they are chemically and biologically inert. Isopropyl alcohol: Ingestion studies on laboratory animals showed that very high oral doses caused increased liver and kidney weights. High oral doses have caused anemia in laboratory animals. Mica: Repeated and prolonged overexposure may lead to chronic lung disease. Mica Coated with TiO2: Repeated and prolonged overexposure may lead to chronic lung disease. In a lifetime inhalation test, lung cancers were found in some rats exposed to 250 mg/m³ respirable titanium dust. Analysis of the titanium dioxide concentrations in the rat's lungs showed that the lung clearance mechanism was overwhelmed and that the results at the massive 250 mg/m3 level are not relevant to the workplace. Nickel, Antimony, Titanium yellow pigment: Antimony and nickel are incorporated into the crystal structure of titanium dioxide. As such, they are chemical and biologically inert.

#### Section VI --- Reactivity Data

Stability: Stable

Incompatibility (materials to avoid): None reasonably foreseeable Hazardous decomposition products: CO, CO2, smoke, oxides of heavy metals reported in Section II

Hazardous polymerization: will not occur

## Section VII — Spill or Leak Procedures

Steps to be taken in case material is released or spilled: Ventilate area. Remove sources of ignition. Prevent skin contact and breathing of vapor. Wear properly fitted vapor/particulate respirator (NIOSH/MSHA TC-23C). If the material has been activated with an isocyanate, wear a positive pressure, suppliedair respirator (NIOSH/MSHA TC-19C).

Confine and remove with inert absorbant.

Deactivate isocyanate containing spills with:

20% Surfactant (Tergitol TMN-10);

80% Water

0-10% Ammonia;

2-5% Detergent;

Balance Water

Waste disposal method: Do not allow material to contaminate ground water systems. Incinerate absorbed material in accordance with federal, state, and local requirements. Do not incinerate in closed containers.

#### Section VIII — Special Protection Information

Respiratory: Do not breathe vapors or mists.

Wear a properly fitted NIOSH/MSHA approved paint spray respirator (TC-23C) during application and until all vapor and spray mist are exhausted. In confined spaces or in situations where continuous spray operations are typical or if proper respirator fit is not possible or if this product is used with an isocyanate hardener (782S, 792S, 793S, 2000S), wear a positive pressure, supplied-air respirator (TC-19C). Refer to the hardener label and MSDS for further information. In all cases, follow the respirator manufacturer's directions for respirator use; do not permit anyone without protection in the painting area.

Ventilation: Provide sufficient ventilation in volume and pattern to keep contaminants below applicable OSHA requirements.

Protective clothing: Neoprene gloves and coveralls are recommended.

Eye protection: Desirable in all industrial situations. Include splash guards or side shields.

### Section IX — Special Precautions

Precautions to be taken in handling and storing: Observe label precautions. Keep away from heat, sparks and flame. Close container after each use. Ground containers when pouring. Wash thoroughly after handling and before eating or smoking. Do not store above 120°F.

Other precautions: Do not sand, flame cut, braze or weld dry coating without a NIOSH/MSHA approved respirator or appropriate ventilation.
