

The Paper Magic Group, Inc.

P.O. Box 977 Scranton, Pennsylvania 18501-0977 (717) 961-3863

November 2, 1989

Ms. Mary A. Trombino
J.L. Hammett Co.
165 Water St.
Lyons, NY 14489

Dear Ms. Trombino:

Because of the "soft paper" material content and form of our various products, we have not been requested to provide the "Material Safety Data Sheet" by either distributors or end users of our various products which may be used in the school classroom.

In the absence of that formalized Material Safety Data Sheet, I can state that the material content of all our products is essentially paper, printing ink, and in some cases adhesive. The inks and adhesives used are non-toxic in the end form of a printed piece. Further, the inks and adhesives used are in wide general use, and the raw material and end product delivered by Eureka is not hazardous when used for the intended decorative purpose by children of school age.

Sincerely,

Patrick J. O'Brien
School Market Manager
