NOTE: This product has been manufactured and screened to eliminate all but a small portion of dust which can become airborne and be breathed. This respirable dust is predominantly harmless except as an irritant to eyes and mucous membranes. It does, however, contain free crystalline silica in trace amounts when airborne, which warrants its classification as a hazardous chemical and determines its TLV.

OSHA (and ACGIH) Threshold Limit Value (TLV):

0.16 mg/ m<sup>3</sup> respirable dust

0.47 mg/ m<sup>3</sup> total dust

Its contents contain **NO** carcinogens listed in NTP, IARC or OSHA publications, and **NO** toxic chemicals.
