

How to be successful in a CTE program

1. Work hard to earn the best grade possible in all classes...especially math and science.
2. Be interested in your career pathway selection. Don't select a program because it's offered at your favorite high school.
3. Be a good team player.
4. Be an active learner on field trips and when working with professionals.
5. Learn as much as possible from professionals. Remember you're on a long term job interview.
6. Be excited to work and willing to work hard.
7. Maintain excellent attendance in school and career related events.
