

Syracuse City School District Building Leadership Framework

Executive Summary

Recognizing the importance of engaging in a continuous improvement process, Syracuse City School District seeks to define what it means to be an effective building leader at all phases of a leader's career. This aim is accomplished by setting high standards for effective leadership based upon research and best practice, supporting leaders to reach those standards, and developing a network of exceptional building leaders who get positive results for their schools.

The Building Leadership Framework and Rubric defines a set of domains and detailed indicators that provide a clear set of expectations for building leaders. The rubric is designed to help building leaders develop the type of leadership practices directly related to substantial gains in student achievement and instructional effectiveness in teaching. Moreover, the leadership practices embedded in the indicators and big concepts are largely tied to the indirect, but vital role and impact school leaders have on student achievement. The rubric also guides observers' assessments of practice for providing feedback and evaluating building leaders.

The Building Leadership Framework Is . . .

- intended to help engage educators in reflective dialogue among and between peers and evaluators to improve practice
- designed to establish a culture of support for building leaders
- used to acknowledge a leader's effective practices that produce results
- a set of clear leadership expectations used to identify specific strengths and areas for growth
- the tool used to guide a fair and transparent evaluation

The Building Leadership Framework is not...

- developed as a checklist, but should be used to weigh the preponderance of evidence over time against the levels of practice defined in the indicators and big concepts
- inclusive of all salient aspects of a building leader's role, rather it focuses primarily on the dimensions of leadership most directly linked to managing teacher effectiveness and increasing student achievement
- meant to address areas of performance related to personal conduct as described in district and state policies

The drafting of the Building Leadership Framework and Rubric was largely informed by the Building Leadership Task Force (made up of senior district leadership, executive directors, principals, and assistant principals) whose suggestions, questions, and concerns regarding the rubric's language were strongly considered during the development of all iterations of the draft.
