Precor SE Flea Growth Regulator

DIRECTIONS FOR USE:
This is a CLASSIFICATION: It is a pesticide under Federal law to use this product in a manner inconsistent with its labeling. This product may not be used or re-labeled as a source of information for the manufacture of other products without prior written authorization from Zoexon Corporation.

Method and Rate of Application: Prepare a solution by adding 1/2 oz. of Precor SE Flea Growth Regulator to 3 gal. of water. Partially fill the mixing container with water, add Precor SE Flea Growth Regulator, and fill to the volume. Use diluted spray solution within 48 hours of (Continued on other side panel)

INTRODUCTION: Precor SE Flea Growth Regulator acts on an immature life stage of the Flea, preventing the development of the pupa. Flea eggs deposited on and larvae crawling on treated areas will not develop into adult Fleas. Existing adult Fleas and Flea pupae are not affected.

If a high population of adult Fleas (the biting stage) is present, the use of an adulticide may be necessary for immediate relief. For best results, use Precor SE Flea Growth Regulator prior to the flea season. When used in conjunction with an adulticide, such as carpet, upholstery furniture and pet sleeping areas, Precor SE Flea Growth Regulator prevents adult Flea emergence for 3 months. Flea control on pets is important in prevention of introduction of adult Fleas indoors. When using this product, and Fleas are problems on pets, the pets should be treated with an effective registered flea control product to prevent the introduction of adult Fleas indoors.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS—CAUTION: Harmful if absorbed through skin. Avoid contact with skin or eyes. In case of contact, immediately flush skin or eyes with plenty of water. Get medical attention if irritation persists.
