

STUDENT HOSTING

Internships & Job Shadows

Help prepare today's students for tomorrow's careers

OUR STUDENTS

- » **Safety certified:** industry safety certification completed prior to internships (OSHA 10, bloodborne pathogens, First Aid/ CPR, FEMA, etc.)
- » **Dressed for success:** with business casual attire and personal protective equipment (PPE) (provided by school)
- » **On track at school:** meeting academic requirements of their CTE program and academic subjects
- » **Have transportation:** to and from the host organization provided by SCSD

Workplace training and site visits are built into each of the Syracuse City School District's 27 CTE programs' curriculums to prepare students for job shadows and internships.

The Syracuse City School District's goal is to develop partnerships with local business/industry in order to provide real-world opportunities for students to apply, and thereby enhance, the knowledge and skills obtained in the classroom.

HOW TO HOST

You can help our students achieve success by:

- » Providing student(s) with a work site orientation to your organization and any required safety training
- » Assisting student(s) in learning skills and workplace knowledge in all aspects of the industry
- » Evaluating intern work and providing constructive criticism

Our Career & Technical Education (CTE) staff will work collaboratively onsite with companies willing to host students in planning activities and facilitating these opportunities. Companies will be provided a direct contact from the CTE department who will be accessible any time. A certificate of liability insurance will be provided to cover all SCSD students at your facility.
